

Robert Grove
Facility Administrator
2011 Spring Emergency Drill

Metro Fire Inspector, Richard Dutton indicated that the complexes managed by Robert Grove which include Environmental Assistance Center, Mid-Cumberland Regional Health, R. S. Gass and Tennessee Bureau of Investigation buildings demonstrated emergency drills that were well structured. Mr. Dutton stated that the safety wardens that have the ability to evacuate employees, tenants and visitors efficiently and effectively during an evacuation drill are better prepared in an emergency than those that do not have an exit strategy. Mr. Dutton recorded that during the observation of the drill it was noted that they were designated persons responsible for providing an all clear, alarms were operable, wardens did appropriate building sweep and all of the tenants egress the complexes with out delay.

Mr. Grove stated that all complexes safety wardens demonstrated a well thought out emergency action plan and their procedures during the evacuation exercise were efficient and effective.

Richard Dutton,
Metro Fire Inspector
